

Dante® Audio Analogue Encoder

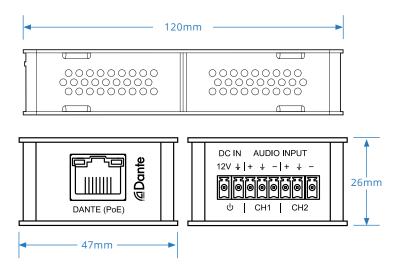

Description

Our DA11AEN has been designed to encode unbalanced or balanced 2ch analogue audio to Dante® digital signal.

The DA11AEN allows any non-Dante® audio source such as mixing consoles, amplifiers, computers and Blustream Matrix products or distribution products to be connected as a source within a Dante® network.

The DA11AEN is a plug & play device that is powered using either PoE (Power over Ethernet) from any PoE network switch or via local 12v power supply input (sold separately).

The DA11AEN also supports AES67 RTP audio transport with independent sensitivity adjustment for each channel as required.
