

4-Way 8K HDMI Switch

Description

The SW41AB-8K HDMI2.1 switcher integrates multiple source devices where the features and functionality of the HDMI2.1 chipset are being utilised for 8K 60Hz, and 4K 120Hz signals.

With selection of 4 x HDMI input sources, the SW41AB-8K can auto-switch based on detecting a 5V hot plug, or a new TMDS signal, RS-232, or manually using IR, or the front panel.

Analogue and optical digital (S/PDIF) audio breakout allows for audio integration. The SW41AB-8K is HDCP2.3 compliant and has advanced EDID management of source devices connected.

Warning: Due to the bandwidth requirements of HDMI 2.1 8K video signals, it is strongly recommend to use Certified Ultra High Speed HDMI® Cables such as Blustream's Precision 48 HDMI 2.1 cable range (available in lengths from 1 to 30mtrs). Performance may be compromised with non certified cables.
