

Blustream DMP168 – 16x8 Audio Matrix Control 4 Driver

This driver for the DMP168 has been developed by a 3rd party integrator. Whilst I/O switching and volume commands, as well as feedback status have been tested and validated internally, the driver contains all API elements of the product which has not yet been verified by our team.

Should you come across any command set of the product during programming, please reach out to your local support team on one of the email addresses at the bottom of this note with your feedback.

Thank you
